Pianos made in Britain

Cavendish are resurrecting the lost art of piano building in Britain. Piano builders, action specialists, stringers, cabinet-makers, polishers and piano tuners are all working together in this country to produce pianos that are not just superb instruments but also objects of beauty.

Mozette

Bourne's March

Cavendish

Cavendish Classic

Despite being of small size (112cm) the Cavendish Classic possesses an astonishing richness of sound. Its treble is open and crystal without ever being harsh. The middle sings naturally and is classically European. The bass astonishes by its depth and full tone without drowning the treble. The range of sound of this instrument is large and its reserve of power is very impressive.

It is an excellent family piano with very good musical qualities at an affordable price.

Cavendish Contemporary

Thanks to longer keys, a larger area of soundboard, and longer hand-made bass strings, our 'Contemporary' model upright offers greater sensitivity of touch and an enhanced dynamic range to produce a very impressive richness of sound for the discerning pianist.

The exceptional mellow clarity of tone and superb sustain make it a delight to play.

Cavendish Chatsworth

The 'Chatsworth' is the jewel in the crown of the Cavendish range.

The case is cabinet-maker built in Yorkshire from solid seasoned timber. This is an entirely one-off process and each piano has its own individual character. A welcome return to the sweet, European piano tone of the past. Using a thinner, acoustically sensitive panel in the top-board the sound is amplified and the true sound of the instrument is heard.

Available in Walnut or Mahogany.

Mahogany

Cavendish 'Baby Grand'

Cavendish grand pianos are a return to traditional British piano craftsmanship.

With a subtle, mellow tone and a sensitive touch a Cavendish Baby Grand is the perfect instrument to grace any home.

Cavendish 'Boudoir Grand'

With a truly remarkable dynamic range the Cavendish 'Boudoir' Grand speaks for itself as a musician's instrument of the highest quality.

Using entirely natural components the Cavendish 'Boudoir' Grand is the flagship model British piano.

This wider construction of the case means that a 186 grand has the same soundboard area as a typical 196 grand piano, creating the power, complexity and character of sound, as well as the feel of playing a much larger piano.
